

### **JENNER BY THE SEA**

**September 22, 1992 – June 8, 2004**

**Handler: Ann Wichmann**

**FEMA Type I, Wilderness Air Scent, SHR, CGC**

Jenner was one of those dogs, right from the start, who just wanted to be good! Jenner was qualified as an operational air-scent search dog with Front Range Rescue Dogs in 1994. At the same time, in a parallel training mode, we were working on his certification as a Federal Emergency Management Agency (FEMA) disaster dog. Jenner achieved the Type II (Basic) standard in October of 1994, and continued disaster work throughout his life. Jenner was one of the early dogs in the country to achieve the Type I (Advanced) certification in August of 1995, and was one of the founding dogs of Colorado Task Force 1. Jenner was certified as a Ranger Service Dog with the City of Boulder Mountain Parks. Jenner was our principal “trainer” for new handlers, humbling many who thought they could hold onto that toy!

Jenner worked a double duty at the WTC, locating the victims of the disaster, and providing incredible solace and grief therapy to the workers. He is loved and missed.
